"Hash by the Billion"

Some day writes Sen Arthur H Vandenberg in the current issue of the Saturday Lvening Post we shall again have a president of the United States who will wish to economize

When this blessed event occurs the senator would like to see such a presi dent aimed with all the tools necessary for paring down unwieldy budgets. One essential tool he believes will be the right to yelo one or more items of an appropriation bill A constitutional amond ment would be necessary to give such power but the senator would not mind linkering with the Constitution for such

A consincing argument can be built up for this cause which has been advocated for years without getting anywhere Today most appropriations are hash by the billions. One bill may-as did H R 11418 approved June 4 1936-carry provisions for down to funds for controlling the Mexican fruit fly Another bill-H R 19630 approved June 22 1936-provided funds for Howard university for an insane institu tion in Alaska and for an experiment sta Hon in the Virgin islands

Faced with this appropriation hash the President must take or leave it all Oc casionally as did President Wilson he vetues important appropriation bills be-cause they have been padded. Yet that practice is dangerous for needed funds may be choked off in a praise worthy effort to step pork barreling

As Sen Vandenberg points out if a president were of the right heart and mind some of those financial difficulties could be avoided But not all The chief executive always has to reckon with the congres sional iich to get something for the folks at home Exhoriation seldom halls a con gressman who wants to impress his con stituents with a new highway at federal

contitutional right of the item acte. Wha not the Preident of United States?

He Who Laughs Last.

Obles conservation council unwittingly has caused merriment by its grave ruling that game may be taken with bow and arrow. But let no careless modern fall into the error of thinking archer, is funny

The how and arrow and thenhusky men who were able to handle the ancient weapon have left their mark indelible on the world a history For hundreds of years the long bow was the only projectile weapon of Grent Britain William the Conqueror is supposed to have won the Battle of Hastings through the ability of his Norman archers to shool over the English shields Whatever may be funny about killing a rabbit with a bow and arrow there never was anything finny about archers which flourished mightile and died hard even ofter the invention of gun; owder

It is an interesting fac that American Indians never got very far with bows and arrows In compedition with the white man Indians siways have come off second best with their traditional wenpon. They were abliged to depend on it for hunting game but their skill lay in the direction of stalking not markemanship Perhaps that is why the conservation councils ruling is funny

This states archers probably are better shots than were the Indians who hunted here when the state was a wilderness But it is hard to imagine them stealing up to their victims to make a clean kill Surely, as James Fenimore Cooper would have it. their presence will be betrayed by a crackling twig long before they get within strik-

First it must guard and preserve the source of its income ond it must see it gets a dollar's worth for every dollar it spends. I hird it must not spend more than it receives bourth it

The principles steak for themselves so readily applicable are they to our personal budgets. Yet in elaborating upon his first point-saleguarding sources of income-Gov Landon hammered upon another for

faxes come to the federal government In two ways he reminded his listeners They are levied directly upon persons and concerns according to ability to pay or assessed indirectly through nuisnace taxes and the like which hit us all regardless of ability to pay For instances in 1932 only 41 cents of every federal tax dollar came from Indirect levies-mostly from persons earning \$25 a week and less in 1938 these hidden imposts yielded 51 cents of every tax dollar. In face of these fig. making the rich becomes nothing but a slugan to catch the unwary

It is our money the present administra tion is wasting the governor declared It is our money which must pay its stagger ing debts. It is our not inexhaustible money which gives the government its ability to boriow. It is always our money -which we work so hard to care. Govern ment recklesaness therefore is our con

Just a Picnic.

According to a Cieveland paper several hundred Ohioans piculcked on a farm near Woosler the other day II was a typical American picnic with husbands wives and children chasing the files away from the pointo saind with horseshoe pitching and ball games giving the men appetites big anough to eat all the ples the women had brought

It was typical except in one respect. Most of the adults belonged to a secret order once strong in the state. The ritual of word and dress was missing as was the milliancy of spirit which used to mark the group But the members one official admitted still are devoted to the old prin They want to deport ailens by the shipload elect congressmen who sup port their program and continue their fight ngaint parochial schools

Constitution Gets Support in West

Sound Foundation is Found Especially Strong in Utah

We billow that governments were in stitute) if out for the benefit if man that he holds men accountable thir als in relation to them both in making laws and idministering them for the good of society

We fellete that no government some exist in some except as such laws ar financia at 1 hidd inviolate as will accure to each in hidden like free exacts of some stirme the right and control of property and the protection of life.

Then President Herber Grant drew at tention to the following quotation from Joseph Santh one of the founders of the church

Joseph Smith one of the founders of the chuich.

The Constitution of the United States is a glorious standard. It is founded in the wisdom of God. It is a hea enly homen it is to all those who are privileged with the sweets of liberty like the cooling shades and refreshing waters of a great rock in a weary and thirsty but? It is like a great tree under whose branches men from every clima can be shielded from the burning tays of the sun.

After reading that quotation President Grant made this comment himself.

Some men are ridiculing today the idea that old inten old fossile so to speak are on the supreme court hench Well. I do not believe any members of the church of Josep Chilst of Latler Day Saints can consistently do that

said Carist of Instell Day Saints can con-siently do that In the same issue of the The Improve ent Fra also occurs an editorial ca-ited Warning to Church Members

Illied Warning to Church Members which says.

With freat riggret we learn from credible sources governmental and others that a few church members are joining directly or indirectly the communiate and are laking part in their activities.

The church does not interfere and has no intention of trying to interfere with the fullest and freast exercise of the political franchise of its members under and with nour constitution.

But communism is not a political party ner a political party ner a political plan under our constitution it is a system of kovernment that is the opposite of our constitutional government and it would be necessary to destroy our government before communism cauld be act up in the United States.

The further warning is then given that

Overwhelmed and bewlidered by the material gifts of the age men question the sufficiency of the ancient moral code in their confusion clear thinking is vanishing though some things should be evident enough. The sutomobile cannot abrogate lite command thou shalt not steal nor can the radio still the voice of conscience. Another fundamental on which the Mormon church is taking a firm position is the metter of the dote. It has instituted a plan to take its own members off the older fundamental different page every day in the Descret Nows a stally newspaper here controlled by the Mormon church is the following statement.

make them idlers. History records that this was not only the police but the practice of Brigham young and it is a restoration of this ideal that prompts the church lenders today in their new relier efforts.

The rolled plan referred to is no interesting experiment in self helj. It is in its initial stages but is proceeding satis factorils and may be regarded as a sub-stantiation of the theory that local communities need institutions can be recognised.

The Stars Say-For Saturday, August 29

A DAY of rather mixed influ ences, astrologically considered, is forecast from the luner posiis forecast from the luner posi-tions. While there may be some annoyences in employment, and confusion or treachery to a minor degree in dealings with large concerns, with the danger of a small loss in speculation, there also are signs of a solid foundation on which to develop the future fortunes. Lands, sound lavestorels insurance or

sound investments insurance of a legacy may lie at the root of such prospects, Those whose birthday it is may find their prospects for a rather sound future put on a solid basis during the year,

aolid basis during the year, either through increased property values, wise investments, a gift, a legacy or insurance. But shun speculative enterprises, keep abert to trickery and be careful in employment. Eiders and domestic, social and sentimental contacts may give much pleasure and gradification.

A child born on this day may have a studious and dependable nature.
